

## Project Development Phase

### Model Performance Test

Date	8 February 2026
Team ID	LTVIP2026TMIDS57513
Project Name	<b>calculating family expenses using service now</b>
Maximum Marks	4 Marks

### Model Performance Testing:

Model performance testing is the process of evaluating how effectively the system functions under expected conditions by checking accuracy, reliability, and consistency of results. In this project, it ensures that expense data is processed correctly, calculations are accurate, and reports are generated efficiently without errors.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Displays family expense data in structured tables and visuals for easy understanding and analysis.
2.	Data Preprocessing	Raw expense data is cleaned, formatted, and prepared by handling missing values and standardizing fields.
3.	Utilization of Data Filters	Filters are applied to view expenses by date, category, or family member for focused analysis.
4.	DAX Queries Used	DAX functions are used to calculate total expenses, monthly summaries, and category-wise spending.
5.	Dashboard design	No of Visualizations / Graphs - 5-6
6	Report Design	No of Visualizations / Graphs - 3-4
