

Project Development Phase

Performance Test

Date	8 February 2026
Team ID	LTVIP2026TMIDS57513
Project Name	calculating family expenses using service now
Maximum Marks	4 Marks

Model Performance Testing:

It evaluates how effectively data is processed, visualized, and presented through dashboards and reports. It ensures that data is rendered accurately, calculations are correct, filters work properly, and visualizations load efficiently, providing reliable insights and smooth user interaction.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Data is accurately displayed in Tableau views, reflecting correct records and values from the data source.
2.	Data Preprocessing	Data is cleaned and prepared by handling null values, correcting data types, and structuring fields before visualization.
3.	Utilization of Filters	Filters are applied to analyze data by category, date, or other dimensions without affecting data accuracy.
4.	Calculation fields Used	Calculated fields are used to compute totals, averages, and summaries for meaningful analysis.
5.	Dashboard design	No of Visualizations / Graphs - 5-6
6	Story Design	No of Visualizations / Graphs - 3-4
